Hi Tom – there has been some discussion in the EOC about ORD's possible modeling effort that I could brief you on in 5 minutes if you wish.

FYI. See the attached article that underscores the broader issues of the river system.

Tomorrow morning I will be attending a meeting with leadership to frame an approach

to the Animas river system. Our role will be very important. I will be sharing the modeling write up. There will most likely be other essential contributions including sampling and analyses needs, fate and transport, exposure, and both health and ecological risk assessment, spatial and temporal analysis and communication. This will involve program offices and regions.

I will keep everyone posted.

Tom
